South Hunsley	5.55	24	6270
Pocklington Provincial	5.32	25	6470
Dale	5.05	26	6685

Key Facts: Exclusion from employment is acknowledged to be one of the main causes of poverty and social exclusion in this country. People who are not in work are more likely to suffer ill-health, anxiety and depression and are more likely to die prematurely. Children who live in workless households are less likely to eat a healthy diet, are more likely to smoke in later life and are more likely to suffer from accidental injuries, (DSS, 1999). The total number of people excluded from employment through sickness, illness, disability or unemployment is estimated to be in the region of 15,100 in this authority, or roughly 8% of the population of working age. This figure far exceeds the official unemployed claimant count, which excludes people excluded from work as a result of ill-health, disability or caring responsibilities. The highest rates were found in the Bridlington, Goole and the Withernsea area of South East Holderness, which all rank within the top 20% most deprived in the country. Indeed, Bridlington South ward ranks amongst the top 10% most deprived in the country. See definitions for data sources and health warnings.
