	St Mary's	84	0.6%	43	41	48.8%
	Tranby	174	1.5%	95	79	45.4%
	Wolds Weighton	43	0.4%	20	23	53.5%
	Wolfreton	83	0.7%	44	39	47.0%

Key Facts In 1991 the authority's Black and Asian minority ethnic community was relatively small compared with other authorities in the Yorkshire & Humber region - accounting for a total of 1561 residents, or less than 1% of the total population. National research has confirmed that people from minority ethnic communities are at particular risk of poverty, poor housing, poor health and social isolation. Discrimination and language barriers also add to this social exclusion. The two largest minority ethnic communities were people of Indian and Chinese origin. Apart from Tranby and Cottingham South, no wards were home to more than 100 people from Black or Asian minority ethnic communities. Given the relatively small size of this population, there is a danger that their needs could be overlooked. See definitions for data sources and health warnings.
