3:00	BREAK	
3:15	Group Exercise	
4:10	Feedback from Groups	David Sheard / Mo Ray
4:30	CLOSE	

Aim:

To enable participants to consider best practice in involving older people with dementia in the design, delivery and evaluation of health and social care services

Objectives:

- To present an overview of best practice from recent dementia care projects on ways to enable participation and involvement
- To summarise the findings of a recent six month project undertaken by the workshop leaders on involving people with dementia in service evaluation
- To enable participants to consider different methods to ensure people with dementia influence the development of services, particularly around developing a range of communication skills
- To enable participants to develop a model for future involvement of people with dementia
